

General Terms and Conditions for the Service and Guarantee Packages of the "Care" Family

fruitcore robotics GmbH, Macairestraße 3, 78467 Konstanz, Germany

(GTC Care Version June 2025)

A. Scope of Validity

- (1) These special General Terms and Conditions apply to our service and guarantee packages, which we offer to you under the brand name of "Care" in the service packages Care and Care Plus, hereinafter referred to as "GTC Care Version May 2025". In addition to the "GTC Care Version June 2025", our current General Terms and Conditions of Sale, Payment and Delivery (GTC) and the "GTC for the Digital Products and Software Packages", which you can view and download on our homepage at www.fruitcore-robotics.com/en/gtc, shall apply.
- (2) The "Care" package offers you a "Predictive Maintenance Module", a "Service Module", a "Support Module" and an "Update Module". The "Care Plus" package also offers you an "Extended Guarantee Module".
- (3) The prices, service contents and other conditions, which are applicable at the time of the conclusion of the contract for your "Care" package, can be found the list of services in the document "Service_specification_fruitcore-robotics" attached to the offer.

B. Content of the Predictive Maintenance Module and the Service Module

- (1) The specific services of the Predictive Maintenance Module and the Service Module within the framework of the Care and Care Plus packages can be found the list of services in the document "Service_specification_fruitcore-robotics" attached to the offer.
- (2) Your personal connection to the IIoT platform "horstCOSMOS" is a prerequisite for using a variety of digitally controlled support and services for the operation, update and maintenance of your "HORST" robot system within the context of the Predictive Maintenance Module and the Service Module.

- (3) All services of the Predictive Maintenance Module are subject to the condition that the customer provides the connection to a functional and sufficiently dimensioned remote data connection at all times.
- (4) If a robot system is not connected to a sufficiently dimensioned remote data connection at all times, then it can be necessary to establish this connection temporarily in the event of service in order to be able to call up all the services of the service module.
- (5) The terms and conditions of the service provider Emnify, which our customers can view and download at https://www.emnify.com/hubfs/20211001_terms_of_service_and_standard_service_level_obligations.pdf, will apply to the use of the IIoT surfstick and SIM card which is provided by us free of charge. fruitcore robotics cannot accept any liability for the functional capability of the IIoT surfsticks provided free of charge, the SIM card and the network availability of the provider Emnify. In this respect, the customer acts at their own risk in relation to fruitcore robotics.
- (6) We do not guarantee a permanent temporal availability of the connectivity to "horstCOSMOS". In particular, we are not liable for interruptions on the connectivity due to power failure, due to non-usability of the server/host ordered by us according to the contract, or due to other events which are beyond our influence and control. In addition to "force majeure" events such as natural disasters (e.g., lightning, storms, high water and low water, snow and ice, earthquakes), this also includes official operating restrictions and employment bans in order to combat illnesses, diseases and possible disruptions due to sabotage and hacker attacks. In the event of temporary disruptions, we will attempt to restore connectivity as soon as possible and make up for any services which have been omitted.

C. Content of the Support Module

- (1) The specific services of the support module within the framework of the Care and Care Plus packages can be found in the list of services in the document "Service_specification_fruitcore-robotics" attached to the offer.
- (2) In order to provide assistance via remote connection, the robot system must be online and connected to the "horstCOSMOS" IIoT platform.

D. Content of the Update Module

- (1) The specific services of the update module as part of the Care and Care Plus packages can be found in the list of services in the document "Service_specification_fruitcore-robotics" attached to the offer.
- (2) In order to download and install updates over-the-air, the robot system must be online and connected to the IIoT platform "horstCOSMOS". The same applies to retrieving software licenses for new software features.

E. Content of the Guarantee Module

- (1) Every robot system is equipped with the "Guarantee module" as standard.
- (2) The contents of the "Guarantee module" are described in the current General Terms and Conditions of Sale, Payment and Delivery (GTC) under Section VII.

F. Content of the Extended Guarantee Module

I. Guarantee Protection of the Extended Guarantee Module

- (1) The "Extended Guarantee Module" as part of the Care Plus package not only offers you an extension but also a content-related expansion of the contractual liability for material defects. The specific services of the extended guarantee module can be found in the list of services in the document "Service_specification_fruitcore-robotics" attached to the offer.
- (2) The guarantee periods are not extended due to the provision of services under this guarantee, in particular not in case of repair or exchange. The guarantee period will not start again in these cases.

II. Error Display

The customer may assert the rights arising from this guarantee by notifying fruitcore robotics or the dealer from whom the HORST robot was purchased in writing or electronically by email or via the online service system on the IIoT platform "horstCOSMOS" within the agreed guarantee period. It is also a prerequisite that the customer reports the error and/or the failure of the robot within 2 weeks after they have detected the error or should have detected the error.

III. Conditions and Scope of Guarantee Services

- (1) A prerequisite for guarantee services is the proper installation, servicing and maintenance according to the assembly instructions and the accepted rules of technology, as well as compliance with the assembly instructions when operating the robot and the use of fruitcore robotics products according to the technical instructions, care instructions, training and current newsletters and notices from fruitcore robotics.
- (2) To maintain the guarantee, the annual inspection of the robot system must be carried out without interruption. The inspection is included in the "Care Plus" service contract.
- (3) Our guarantee only applies to original HORST robot systems. During the respective agreed guarantee period, they include, at our option, the exchange or repair of all original components contained in the robot kinematics (e.g., encoders), provided that these show an initial production or design defect which already existed at the time of transfer of risk. At the discretion of fruitcore robotics, generally overhauled components can be utilized for this purpose. The extended guarantee also covers wear parts of the robot, the robot control "Control", and the operating panel "Panel". Wear parts are belts and external cables. The customer must ensure that the robot is accessible in order to execute the guarantee services.
- (4) The guarantee services also include the expenses for assembly, transport and other costs of repair and/or exchange of the defective component.
- (5) The guarantee does not include compensation and reimbursement of expenses for waiting times and work which is required because the robot is not prepared for the performance of our guarantee services, is not accessible, or is not immediately available for other reasons when our service staff arrives. This applies in particular when we have to set up our own remote connection on-site to provide the guarantee service or if we have to remove the robot from a complete system.
- (6) The guarantee does not include the costs and expenses which are incurred in order to execute our guarantee services, which are necessary to remove or reinstall the connected accessories, additions, additional units and other attachments which have been connected by the customer to HORST. Furthermore, the guarantee does not include the re-teaching of the application,

this can be executed by fruitcore robotics experts after separate commissioning.

- (7) The customer bears the burden of proof for the existence of a guarantee case on an original HORST robot system.

IV. Exclusion of Guarantee Services

- (1) Our guarantee does not comprise parts which become worn, torn or defective due to intentional or grossly negligent improper use or due to recognizable misuse deviating from the specifications of our respective current operating manual. In these cases, the customer can request a repair from us at a charge.
- (2) Customer-specific components, devices, jigs, accessories, and services such as camera systems, sensors, grippers, gripper jaws, feed tables etc. which are connected to our robots by third parties are not an integral part of our guarantee services. This also applies to the suitability and performance of the interfaces and communication between our robots and the customer-specific components, accessories and other additional units which have been supplemented by third parties.
- (3) The guarantee claim does not cover:
- (a) damage due to aggressive environmental influences, chemicals, cleaning agents etc.;
 - (b) defects on the fruitcore robotics robot caused by faulty installation, transport or trial operation.
- (4) The guarantee will be terminated with:
- (a) installation, maintenance, repair or care which is executed by non-professional and unauthorized people;
 - (b) non-compliance with the instructions for assembly, care, and use; in accordance with the installation instructions, these GTC and instructions and specifications in accordance with Predictive Maintenance;
 - (c) independent alterations, amendments or modifications to the robot system consisting of kinematics, control, software and the associated energy, information and media guides;
 - (d) defects caused by the installer or any other third parties;
 - (e) damage caused by force majeure or natural disasters, including but not limited to floods, fires, power outages and short circuits.

V. No Compensation for Consequential Damages

The guarantee services do not, in any case, comprise compensation for indirect consequential damages such as for loss of profit or business interruption, or compensation for damages which are suffered by third parties.

VI. Transferability of Rights Under the Guarantee

The claims arising from the guarantee are exclusively provided for our customers and the customers of our system partners and are not transferable to third parties without our express prior consent.

VII. Rights Arising from Liability for Material Defects

In addition to the rights arising from the guarantee, the customer shall also be entitled to the claims arising from the liability for material defects under the law on sales in accordance with our General Terms and Conditions of Sale, Payment and Delivery. These claims shall not be limited by the guarantee.

G. Duration and Termination

The initial term of Care and Care Plus is 12 months from the date of purchase. They will each be respectively extended by an additional year when they are not terminated by written notice from the customer no later than 2 months before the expiry of the initially agreed contract duration or the tacitly renewed contract duration.

Notice of termination must be sent by e-mail to vt-innendienst@fruitcore.de.

H. Later entry into a service contract and term extension

- (1) If a Care or Care Plus service agreement is not concluded directly upon purchase of the robot system, a remote system check and/or an on-site inspection of the robot system by fruitcore robotics must take place before the agreement is concluded. fruitcore robotics will decide on the necessity of an on-site inspection based on the remote system check.
- (2) The same applies if, after terminating a Care or Care Plus contract, an equivalent or higher-value service contract is not immediately concluded.

- (3) Based on the findings of the remote system check or inspection, fruitcore robotics will decide whether to allow the customer to enter into the service contract retroactively.
- (4) The costs for the remote system check or inspection shall be borne by the customer in all cases. If a Care or Care Plus contract is subsequently concluded, the remote system check or inspection will not be charged separately, but will be considered the first annual inspection within the service contract.
- (5) For the Care Plus service contract, fruitcore robotics must authorize the extension of the contract each year. The decision as to whether a further extension of the Care Plus contract for the robot system is permissible will be made during the annual inspection.
